

## Our measurement services

We provide measurement services for the compressed air industry

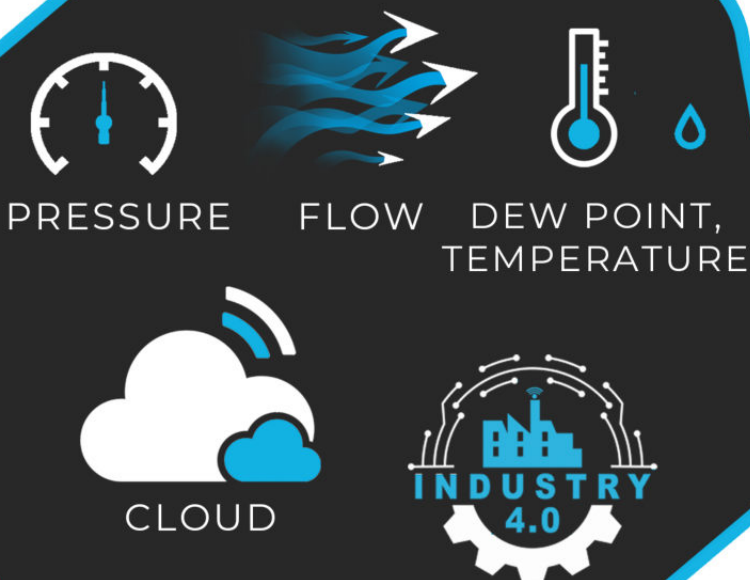

- ✓ flow (m<sup>3</sup>/min)
- ✓ volume (m<sup>3</sup>)
- ✓ pressure (bar)
- ✓ dew point - moisture content (°C)
- ✓ energy amount (kWh)
- ✓ ISO50001 energy management system measurements

Additional services available:

- ✓ residual oil content in compressed air
- ✓ particle content

VPFlowScope M

## The advantages of our flow measurement services are significant

- ✓ the measuring devices are preset
- ✓ the equipment sensor is installed in the compressed air pipe and connected to a 230V
- ✓ after connecting the PVS SmartAir the data can be read immediately at cloud service
- ✓ thanks to our measurement technology, you do not have to wait for measurement results for several weeks as in traditional measurements.

## SmartAir products and services

- ✓ flow meters
- ✓ dew point meters
- ✓ pressure sensors
- ✓ all compressed air measurement services
- ✓ PVS SmartAir sales and service sales
- ✓ technical support
- ✓ installation and commissioning services
